

Permit To Immobilise Main Engine

Masters/Owners and Agents are advised that a vessel berthed in Aberdeen Harbour shall not immobilise its main engines, without permission from the Harbour Master.

Any request to immobilise should be made by completing and submitting "AHB Immobilisation Form" to VTS.

Masters/Owners and Agents are advised that the permit is only valid on common user berths and as far as possible VTS should be advised - prior to the vessels arrival - that a request for immobilisation will be submitted.

Please note that the completion of this form does not assume permission and is subject to operational requirements.
